

# Clegg Company, LLC

1444 South Kelly Rd  
Schenectady NY 12306  
(518) 864-5396 ~ (518) 864-5474 fax

The Cleggs have been serving the material handling industry for over 30 years!

## Model Selection

- **140** best for closet, utility rooms
- **220** great as a residential door or as room dividers
- **240** perfect for larger commercial needs or larger residential room dividers
- **440/550** Visifold
- **640/740** Alumifold
- **2100** for moderate commercial acoustic rated door
- **3300** for acoustic rated door, double panels

\* **Don't forget to list the finish you'd like**

**Mandi Clegg**  
cleggcompanyllc@gmail.com

## How to decide which size to order:

- **Width** - Finished opening size jam to jam to within 1/8" please
- **Height** - Flooring surface (rug surface, linoleum, concrete) to ceiling finished height, this must be a solid surface, door tracks are not attachable to acoustic ceiling grid without special grid track attached firmly above the acoustic ceiling.
- **Measure jamb to jamb width**
- **Measure from surface of flooring** (rug/linoleum) to header (ceiling/archway)  
Your Door will be made for the price shown to YOUR exact dimensions.
- Specify Left or Right Hand Stacking. If the door needs to stack to your right hand jamb, it's a right hand stacking door.
- **Caution!** If there MAY come a day when your vinyl tile floor will be carpeted, assume the thickness of a carpet in place NOW, place a welcome mat or two on the floor and then measure to compensate for later carpet installation. Better to have a little extra gap now. The door is manufactured to have about 1/2" clearance using your measurements.

## Shipping

- Many models can go UPS, size and weight factors - FREIGHT PAID IN CONTINENTAL US Specialty charges for residential delivery and non-commercial delivery are not included.

**Prices can be found at our website:

### **A Few Comments from Past Customers:**

- "Thank you for going business with us. The doors look and operate wonderfully. as soon as we get the final touches done I will try to send you some pictures. Thanks again for your help and cooperation..." Scotty Coe, Welcome View Baptist Church (6 Woodfold 2100 doors)
- "...sure happy with the doors you sent...will send pics once up and installed."  
"...you guys are the only ones we use for accordion doors....." Dr. Owen, A Team Approach Physical Therapy, Bloomington NJ (5 Woodfold 240 doors)
- "We love the door, it's great! I did have a sweet little girl, she is doing fine except even with the wonderful door, she does not like to sleep much!" Michelle L., Agoura Hills, CA (Woodfold 240 door)
- "We love it. It is perfect for our situation. It seems to be very durable. Your service was right on time. The installer had to call about one verification on the install but it went up with the help of about 4 people holding it straight, 600 lbs. that is a lot of weight!"  
Yvonne, Little Caterpillars Development Center (Woodfold 2100 door)
- "The total installation time was one hour and 15 minutes. The picture of the screw that you see (not shown) is a 2 1/2 inch steel wood screw that we used in place on the ones sent. We did this since we installed the brackets on 24" centers."  
Greg Waddell, Tangle Ridge Builders
- "It took less than an hour to install. I did need my 10 year old son to steady the door while I installed the top rail. The door is heavy. I like that. I've got a couple of cats that were able to push their way through the old door. Not this one. Fit and finish are perfect." –Jeff S., California, personal use (Woodfold 220H Accordion door)
